

B2
at least one phosphoglyceride, wherein said composition forms a moldable mass upon admixture with water.

B3
40. (Amended) A preparation as claimed in claim 31, wherein the lipid consists of at least one phospholipid and a water-based liquid as carrier.

B4
42. A preparation as claimed in claim 40, wherein the weight ratio between lipid and water or some other water-based liquid is in the order of 1:2 to 10:1.

43. (Amended) A preparation as claimed in claim 31, further comprising glycoseaminoglycan.

44. (Amended) A preparation as claimed in claim 43, wherein said preparation consists of a free-flowing mixture of sodium hyaluronic acid and calcium phosphate granules which can be packed and then rehydrated in connection with use.

45. (Amended) A preparation as claimed in claim 31, wherein the calcium phosphate granules have a Ca/P ratio which is between 1 and 2.

B5
47. (Amended) A preparation as claimed in claim 45, wherein the calcium phosphate is selected from the group consisting of dicalcium phosphate dihydrate, octacalcium phosphate, tricalcium phosphate and hydroxyapatite.

48. (Amended) A preparation as claimed in claim 45, wherein the calcium phosphate further comprises materials selected from the group consisting of magnesium, fluorine and carbonate ions.

B6
52. (Amended) A preparation as claimed in claim 31, further comprising biologically-active factors selected from the group consisting of tissue-promoting factors, factors which inhibit decomposition of tissue, and growth factors.
